The Overview

We are Minisense, an ambitious player in the field of automation. Our focus extends beyond specific markets, reaching every segment that can benefit from automation, especially in the Indian 3-Tier market. Picture us as the “Tesla of lifestyle”, delivering accessible hardware and software solutions to enhance conventional setups.

Minisense

The Problem

Today electricity wasted in India is about 15-25% of generation per 24 hours

The Growing Demand for Smart Homes
7.5% in 2022 and is expected to hit **22%**
by 2028.

Electricity wasted
extends to cost us

\$\$\$
USD

MAJOR FACTORS ACCOUNTABLE -

- Environmental Commitments - (CAGR) of **7%** in energy demand 2022-2027
- Security Concerns
- Parental Control

Non-cake induces an elevation in

21% electricity
wastage

11% discomfort,
unawareness

The Problem

Comfort and User Experience:

User satisfaction hinges on creating an intuitive, seamless, and comfortable automated environment,

with a **95%** user approval rate linked to a well-designed smart home system.

<https://www.statista.com/outlook/dmo/smart-home/india>

The Hardware-Software Dilemma:

Achieving seamless synergy between hardware and software presents a challenge, with compatibility issues affecting over **30%** of automation installations.

Limited Expansion and Affordability:

Scaling up automation remains restricted by affordability, with high-quality smart switches costing up to **RS 17,000**, while the average monthly income for many users is around **RS 33,000**.

Minisense

Solution

✔ ESP32 Smart Home Hub

Acts like a round-the-clock attendant with mqtt protocol and miniature relay.

✔ Wi-Fi Extender Capabilities

Gives continuous reminders of parental control, hence not missing out on vital times with your kids.

✔ The sincere supervisor

- The app provides real-time data, scheduling, and remote control, enhancing user convenience.

Minisense

Solution

ESP-WIFI-CSI

Presence detection module to make your job easy to save electricity.

EMQX Solution

MQTT protocol based IOT platform solution to keep seamless connectivity.

User-Friendly Control and Monitoring

We offer a user-friendly mobile app that provides real-time data, scheduling, and remote control, enhancing user convenience.

Minisense

A Simple Set-Up

Step 1

Fit your CAKE in their respective switchboard.

Step 2

CAKE APP in your phone, gets connected to the Wifi/Bluetooth

Step 3

Configure and setup schedules

Step 4

That's it! Set up is done. Your smart home begins here.

Minisense

Hardware Features

Snooze

Bluetooth and Wifi

Power consumption tracker

Server connectivity at all time

Data privacy

IOT Device

Sleep Mode (Multi modes)

Reports Data Backup

Minisense

CAKE's Dashboard Features

- ✓ Device Control: Easily control connected devices
- ✓ Status Monitoring: Check real-time device status.
- ✓ Automation and Scheduling: Create routines and schedules
- ✓ Energy Usage Data: Monitor device energy consumption
- ✓ Access Control: Enhance security and permissions

Minisense

Our Unique Selling Proposition

Multipotentialite

You can add not just one, but many system caretakers for you.

In-house IOT Platform

offers complete control and customization, allowing us to tailor our connected ecosystem to our unique needs

Cost Effective

An attractive choice for budget-conscious consumers get benefits of smart home technology

Customizable Automation

Our smart MCU empowers users to create personalized automation routines

Enhance WIFI

Can be used as WIFI extender and WIFI as object detection sensor

Minisense

Competitive Scenario

Category	CAKE	Kasa Smart	Wemo	Wipro
Customisable	■■■■■	■■■	■	■■
Remote control	✗	✗	✗	✗
Rewards	🎁	😞	😞	🎁
APP Control	✓	✓	✓	✓
Dimmer switch	✓	✓	✗	✓
Cost	RS 2500 (6 Load) 8 Loads Extendable	RS 1470 (1 Load)	RS 4000 (1 Load)	RS 1600 (4 Load)

Minisense

Competition

1. **Market Saturation:** In some industries, the market may already be saturated with established competitors, making it challenging for new entrants to gain a foothold.
2. **Price Wars:** Fierce price competition responsible for erode profit margins.
3. **Product Differentiation:** Various product features make it difficult to maintain homogeneous standards for home automation.

Barrier to entry

1. **High Capital Requirements:** Initial investment in infrastructure and facilities can be substantial (e.g., manufacturing, telecommunications).
2. **Regulatory Hurdles:** Compliance with government regulations and permits poses entry challenges (e.g., healthcare, finance).
3. **Economies of Scale:** Larger competitors enjoy cost advantages that new entrants can't match.
4. **Intellectual Property:** Patents and copyrights create legal barriers in tech and innovation-driven sectors.
5. **Network Effects:** As more users join, network-dependent businesses become harder to compete with (e.g., social media, payment platforms).
6. **Distribution Access:** Established firms have exclusive access to distribution channels and retailer relationships.
7. **Brand Loyalty:** Strong brand recognition and customer loyalty make it tough for newcomers.
8. **Switching Costs:** Industries with high switching costs deter customers from changing suppliers, benefiting incumbents.

Incubation Ask

For our product, CAKE, an IoT-based end-to-end solution, I'm seeking the following support and resources in our incubation pitch:

01

First and foremost, we require mentorship from seasoned professionals who can provide guidance and expertise.

02

To bring CAKE to its full potential, we also need assistance with prototype development and product refinement. Furthermore, we seek opportunities to connect with our target markets and potential clients, enhancing our ability to bring CAKE to the right audience effectively.

03

we are looking for support in branding and networking to ensure that CAKE is not just a product but a recognized and trusted name in the industry. Additionally, financial support, in the form of an ignition grant, is essential to kick start our venture and bring CAKE to life.
